LOW ROLLING RESISTANCE SOLUTION FOR ELECTRIC TRUCKS

Best all-around pneumatic tyre for electric forklifts. Engineered to deliver low rolling resistance and reduced vibrations for optimal performance.

FLAT TREAD PROFILE

- Enhances stability and provides even tyre wear

RIB PATTERN AND LOW-ABRASION COMPOUND

- Provides low rolling resistance for best energy efficiency

SMOOTH CONTINUOUS CENTRE LUG

- Reduces vibration and provides enhanced steerability

REINFORCED CARCASS AND SIDEWALL

- Provides additional puncture resistance to prevent flat tyres

Remarks

(1) Consult tyre and wheel manufacturer for confirmation of the suitability of the tyre/rim combination particularly with regard to rim profile and wheel strength.

(2) The speeds quoted in the table are the maximum speeds of the unloaded vehicle. An increase in load capacity for lower speeds is not permitted. Loads apply to cyclic service applications. Cyclic service means applications where tyre are not used continuously at the load indicated by its Load Index and Speed Symbol. It does not refer to the length of time a vehicle is in use, but rather that there is a variation in load and/or speed.

* Tube size is identical to tyre size

** Table shows standard valves. Other valves on request.

NHS – Not for Highway Service: Tyres primarily designed for use outside of public roads, but suitable for temporary/incidental use on public roads.

All tyres come with tube and flap.

It is possible that certain items are not sold in your region.

Please contact your local sales contact to check tyre availability in your region.
